

DOS AND DON'TS OF FIRE SAFETY

The following are some of the guidelines to follow when handling fire safety and safeguarding;

- In case of a fire emergency, exit the building carefully to the fire assembly through the fire exits, whenever there's fire. This prevents confusion and chaos during that time and prevents further damage to people and property.
- Do not use the fire extinguishers without looking at the label to know it's the right one. This is to make sure there's no further damage to property as we're putting out the fire.
- Take attendance as soon as everyone is gathered at the fire assembly. This is to make sure no one is left behind and potentially be in danger.
- Do not go back into a burning building for personal belongings as the building might collapse and trap you inside or you might fall unconscious inside the burning building, putting yourself in danger.
- If you are skilled in first aid, go around trying to offer first aid to those injured as you wait for the ambulance and fire brigade.
